The Ultimate LinkedIn Guide

I am going to share my current LinkedIn profile details with you. Your job is to act as a LinkedIn growth strategist, personal branding expert, and content coach combined.

Work through my profile section by section and give me exact copy, not suggestions, not tips, actual written content I can directly paste and use.

STEP 1 — PROFILE AUDIT & OPTIMISATION

Go through each section in this exact order:

1. Cover Image

- Tell me exactly what my cover image should say, show, and communicate
- Give me the exact text to put on it
- Describe the visual concept — colors, layout, tagline, CTA if any
- If I don't have one — tell me what to create and with which free tool

You can either make Claude create your Cover Image or Use Chat GPT Images 2.0, it's fantastic

2. Display Picture

- Tell me exactly what kind of photo works best for my industry and role
- What to wear, expression, background, framing
- If I don't have a good one — tell me how to shoot one with just my phone

Choose a simple, authentic & solid background image (avoid selfies)

3. Headline

- Write me 3 headline options — from safe to bold
- Each must include: role + value I provide + who I help
- Max 220 characters
- Must be keyword-rich for LinkedIn search

4. Summary (About Section)

- Write a full About section — 4 to 5 paragraphs
- Para 1: Hook — one line that stops the scroll

Priya Singh

@WorklifewithPriya

[Instagram](#) [LinkedIn](#) [YouTube](#)

- Para 2: Who I am professionally and what I bring
- Para 3: What I have done — achievements with numbers
- Para 4: What I currently do and who I help
- Para 5: CTA — what should someone do after reading this
- Write in first person, conversational but professional
- End with 10 keywords for LinkedIn SEO

5. Experience Section

- For each role I share — rewrite the description
- Each role must have: 1 line role summary + 4 bullet points with numbers and impact
- Bullets must start with strong action verbs
- Keywords from my industry must be naturally included

6. Skills Section

- Give me the top 20 skills I must have based on my profile
- Tell me which ones to prioritise for endorsements
- Tell me which skills are most searched in my field right now

7. Featured Section

- Tell me exactly what to put here if I have nothing
- Give me 5 ideas of what to feature — posts, documents, links, or media
- Write the caption for each featured item

8. Recommendations

- Write me 2 recommendation templates I can send to colleagues to fill in about me
- Make them specific, credible, and natural sounding

9. Creator Mode & Other Settings

- Tell me if I should turn on Creator Mode
 - What topics to add
 - What my LinkedIn newsletter could be called and what it should cover
-

STEP 2 — 21 DAY POST WRITING PLAN

Create a 21-day LinkedIn post calendar for me with maximum variation. Use this posting rhythm:

- Monday: Career insight or industry update
- Tuesday: Personal story or lesson learned
- Wednesday: Practical how-to or tips post
- Thursday: Hot take or bold opinion
- Friday: Win, reflection, or gratitude post
- Saturday: Resource, tool, or recommendation
- Sunday: Rest or optional engagement post

For every single day give me:

 Day number + theme  Post idea in one line  Goal of this post (build authority / build relatability / drive engagement)  Brief script with placeholders like [your industry] [your result] [your story] so I can fill it in fast

Make sure to include across the 21 days:

- 4 to 5 personal story posts — real human moments, not just professional wins. Things like a hard day at work, a moment of self doubt, a lesson from a failure, a funny workplace moment, a personal habit that changed everything
- 3 hot takes that are slightly polarising but professional
- 3 how-to posts with clear actionable steps
- 2 posts about AI tools and how you use them at work
- 2 posts about something from daily work life — a meeting, a decision, a conversation — turned into a lesson
- 1 post about a book, podcast, or resource that changed how you work
- 1 appreciation or gratitude post

STEP 3 — DAILY WORK TO CONTENT CONVERSION SYSTEM

Teach me a simple system I can use every single day to turn my regular work life into LinkedIn content.

Give me:

The 5-minute daily content capture habit:

Priya Singh

@WorklifewithPriya

[Instagram](#) [LinkedIn](#) [YouTube](#)

- What to note down every evening before I shut my laptop
- 5 trigger questions I ask myself daily to find post ideas
- A simple template I fill in daily: Situation → Lesson → Post angle

Content from meetings:

- How to turn a boring meeting into a LinkedIn post without revealing confidential info
- Give me 3 example post angles from a typical work meeting

Content from mistakes and failures:

- How to talk about a mistake professionally without oversharing
- Give me a fill-in-the-blank template for a mistake post

Content from wins:

- How to share a win without sounding like you are bragging
- Give me a fill-in-the-blank template for a win post

Content from observations:

- How to turn something you noticed — in a meeting, in a conversation, in your industry — into a thought leadership post
- Give me 3 example observation-to-post conversions

STEP 4 — LINKEDIN GROWTH CHECKLIST

Give me a simple weekly checklist — what to do every week to grow on LinkedIn consistently:

- How many posts per week
- How many comments to leave on other posts
- Who to engage with and how
- How to use LinkedIn analytics to improve
- One thing to do every Friday to prep for next week

My profile details are: [PASTE YOUR LINKEDIN URL OR SHARE YOUR CURRENT HEADLINE, SUMMARY, EXPERIENCE, AND SKILLS HERE]

Now go section by section. Give me everything — written, ready to use, zero fluff.
